List of Contents

NUMBER 1

Phoebus Rosakis and **Qing Jiang**	1	On the morphology of ferroelectric domains
A. Tripathi, R. P. Chhabra and **T. Sundararajan**	13	Predictions of drag and shape of a fluid particle in creeping flow by upper bound approach
D. G. Roxburgh, D. J. Steigmann and **R. J. Tait**	27	Azimuthal shearing and transverse deflection of an annular elastic membrane
I. Figueiredo and **L. Trabucho**	45	A class of contact and friction dynamic problems in thermoelasticity and in thermoviscoelasticity
T. D. Little and **R. E. Showalter**	67	The Super-Stefan problem
Ömer Yavaş and **Nuri Akkas**	77	Chaotic behaviour in nonlinear lattices
Victor Birman	95	On three-dimensional state of thermal stresses in a transversely isotropic plate with a circular hole
Hilmi Demiray and **Ali Ercengiz**	105	Harmonic waves in a prestressed viscoelastic tube filled with a viscous fluid
Galal M. Moatimid	119	Electrodynamic stability with mass and heat transfer of two fluids with a cylindrical interface
Benjamin Wilner	127	Asymptotic stress analysis of two phase materials
Cha'o-Kuang Chen and **Cheng-Ren Lin**	131	Natural convection from an isothermal vertical surface embedded in a thermally stratified high-porosity medium
Konstantin Z. Markov	139	On a microstructural model of damage in solids
Call for Papers	I	

NUMBER 2

Edoardo Scarpetta	151	Well posedness theorems for linear elastic materials with voids
J. Sarkar, S. C. Mandal and **M. L. Ghosh**	163	Diffraction of elastic waves by three coplanar Griffith cracks in an orthotropic medium
Jianmin Qu	179	Scattering of plane waves from an interface crack

A. Chattopadhyay and **S. Choudhury**	195	The reflection phenomena of P-waves in a medium of monoclinic type
Kurt Frischmuth and **Vito Antonio Cimmelli**	209	Numerical reconstruction of heat pulse experiments
H. Ramkissoon and **S. R. Majumdar**	217	Visco-elastic flow in tubes subjected to pulses
Mark A. Johnson and **Millard F. Beatty**	223	The Mullins effect in equibiaxial extension and its influence on the inflation of a balloon
H. M. Zbib, J. P. Hirth and **I. Demir**	247	The stress intensity factor of cylindrical cracks
S. Repin and **G. Seregin**	255	Error estimates for stresses in the finite element analysis of the two-dimensional elasto-plastic problems
George Dassios, Kiriakie Kiriaki and **Demosthenes Polyzos**	269	Scattering theorems for complete dyadic fields
Lucia Drăguşin	279	Bifurcations in the behaviour of granular materials
M. A. Rigano and **M. Torrisi**	293	Lie symmetries of a simplified model for reacting mixtures

NUMBER 3

Yu Qin, Jianlin Guo and **P. N. Kaloni**	303	Double diffusive penetrative convection in porous media
Abou El Magd A. Mohamed, Elsayed F. A. Elshehawey and **Yusry O. El-Dib**	313	Electroviscoelastic Rayleigh–Taylor instability of Maxwell fluids—II. Effect of a periodic tangential electric field
O. P. Bhutani, M. H. M. Moussa and **K. Vijaykumar**	331	Krook–Wu model and integrability
D. M. Haughton and **B. A. McKay**	335	Wrinkling of annular discs subjected to radial displacements
Z. Q. Yue	351	Elastic fields in two joined transversely isotropic solids due to concentrated forces
Shobha Sood and **K. N. Mehta**	371	Transient non-Darcy free convection with temperature dependent viscosity
Hui Fan and **Shaowen Qin**	379	A piezoelectric sensor embedded in a non-piezoelectric matrix
Zhen-Qiang Cheng and **Ling-Hui He**	389	Micropolar elastic fields due to a spherical inclusion

D. Iesan and **A. Pompei** 399 On the equilibrium theory of microstretch elastic solids

C. R. Reid and **F. Jafari** 411 The kinematics and general field equations for continuum mixtures

T. C. Chiam 429 Hydromagnetic flow over a surface stretching with a power-law velocity

Ali J. Chamkha 437 Hydromagnetic two-phase flow in a channel

Y. L. Li, S. Y. Hu and **R. J. Tang** 447 The stress intensity of crack-tip and notch-tip in cylinder under torsion

NUMBER 4

Guido Dhondt 457 Application of the discrete Markov method to crack propagation problems

Y. G. Lai, R. M. C. So and **A. J. Przekwas** 469 Turbulent transonic flow simulation using a pressure-based method

S. K. Tomar and **M. L. Gogna** 485 Reflection and refraction of coupled transverse and micro-rotational waves at an interface between two different micropolar elastic media in welded contact

Lando Mentrasti 497 Curved thin-walled open–closed cross section beams with finite width

S. K. Malik and **M. Singh** 525 Rosensweig instability with surface adsorption

V. D. Sharma and **Ch. Radha** 535 Similarity solutions for converging shocks in a relaxing gas

Rama Shankar and **Anwer A. Bassaif** 555 On the decay of a sawtooth profile in nonequilibrium magnetogasdynamic flow

E. Smith 565 The representation of J in terms of eta factors and energy integrals for an elastic softening solid

Yu. Z. Povstenko 575 Straight disclinations in nonlocal elasticity

Nicolas Charalambakis 583 Shear banding in non-uniform straining of ductile strain-rate sensitive materials—a steady strain-rate approximation

Letters in Applied and Engineering Sciences

Antonios Charalambopoulos 599 Inverse scattering for an acoustically soft scatterer in the low-frequency region

I Call for Proposals

NUMBER 5

M. Şinasi Göğüş	611	The steady flow of a binary mixture between two rotating parallel coaxial disks
A. A. Yevtushenko and **R. B. Chapovska**	625	About interaction of frictional heat generation and wear on transient axi-symmetrical contact of sliding
T. J. Delph and **P. A. Blythe**	633	The steadily propagating crack in an elastic/power-law material: second order solutions
Seungho Paik and **Hoa D. Nguyen**	641	Flow and heat transfer in a molten soil pool induced by electromagnetic fields generated by thermal plasmas
O. P. Bhutani, Surja Kumari and **Sarbeswar Raut**	659	On the propagation of waves due to a localized periodic source in an unbounded isotropic rotating medium permeated by a magnetic field
Y. Tambour and **S. Khosid**	667	On the stability of the process of formation of combustion-generated particles by coagulation and simultaneous shrinkage due to particle oxidation
J. E. Dunn and **K. R. Rajagopal**	689	Fluids of differential type: critical review and thermodynamic analysis
Dennis A. Siginer and **A. Valenzuela-Rendón**	731	Unsteady non-viscometric flows in tubes driven by rotational boundary waves—I: longitudinal field
M. A. Gorgui, M. S. Faltas and **A. Z. Ahmed**	757	Motion generated by a porous wave-maker in a continuously stratified fluid

NUMBER 6

Z. S. Olesiak and **Yu. A. Pyryev**	773	A coupled quasi-stationary problem of thermodiffusion for an elastic cylinder
M. Kumari, H. S. Takhar and **G. Nath**	781	Unsteady flow of a viscous fluid between two parallel disks with a time varying gap width and a magnetic field
V. K. Kalpakidis, E. P. Hadjigeorgiou and **C. V. Massalas**	793	A variational principle for elastic dielectrics with quadrupole polarization
A. I. Murdoch	803	A scale-dependent model of the boundary of a solid body
H. Huang, V. J. Modi and **B. R. Seymour**	815	Fluid mechanics of stenosed arteries
M. Cherkaoui, H. Sabar and **M. Berveiller**	829	Elastic composites with coated reinforcements: a micromechanical approach for nonhomothetic topology

P. Glaister 845 Prediction of steady, supercritical, free-surface flow

S. Adali, A. Richter and V. E. Verijenko 855 Non-probabilistic modelling and design of sandwich plates subject to uncertain loads and initial deflections

T. K. V. Iyengar and D. Srinivasa Charya 867 Slow steady rotation of an approximate sphere in an incompressible micropolar fluid

Mıthat İdemen 879 On the radiation pattern related to cylindrical objects buried in a slab and some of its applications

David J. Beatty, John S. Walker, Samuel H. Brown and Neal A. Sondergaard 895 Inertial effects in electromagnetically driven liquid-metal flows with a periodically wavy boundary

Young Sik Kim, Herschel Rabitz, Mohsen Tadi, Attila Askar and John B. McManus 907 Generation of controlled acoustic waves by optimal design of surface loads with constrained forms

NUMBER 7

Valery I. Levitas 921 The postulate of realizability: formulation and applications to the post-bifurcation behaviour and phase transitions in elastoplastic materials—I

Valery I. Levitas 947 The postulate of realizability: formulation and applications to the post-bifurcation behaviour and phase transitions in elasoplastic materials—II

P. Connor and R. W. Ogden 973 The effect of shear on the propagation of elastic surface waves

Vincenzo Ciancio and József Verhás 983 Thermodynamic theory for wave guides

Jianguo Wang and Karl Schweizerhof 995 The fundamental solutions of moderately thick laminated anisotropic shallow shells

S. Papargyri-Pegiou 1005 Stability of the axisymmetric analytical and numerical solutions in a thin-walled pressurized torus of compressible nonlinear elastic material

Ion A. Crăciun 1027 Uniqueness theorem in the linear theory of piezoelectric micropolar thermoelasticity

G. A. Holzapfel and G. Reiter 1037 Fully coupled thermomechanical behaviour of viscoelastic solids treated with finite elements

G. Caviglia and A. Morro 1059 Wave propagation condition in linear anisotropic viscoelastic media

Call for Papers I

NUMBER 8

N. Rudraiah, R. M. Barron, M. Venkatachalappa and C. K. Subbaraya	1075	Effect of a magnetic field on free convection in a rectangular enclosure
Xiaojing Zheng and Jong S. Lee	1085	On the convergence of the Chien's perturbation method for von Karman plate equations
Hui Fan	1095	Decay rates in a piezoelectric strip
S. Kadioglu and F. Erdogan	1105	The free-end interface crack problem for bonded orthotropic layers
V. G. Hart and Jingyu Shi	1121	Governing equations for wave propagation in prestressed joined dissimilar elastic tubes containing fluid flow: with an example for a tapered section
Dorin Iesan and Ludovico Nappa	1139	Extension and bending of microstretch elastic circular cylinders
Mieczysław S. Kuczma and J. R. Whiteman	1153	Variational inequality formulation for flow theory plasticity
K. Viswanathan and U. Sharma	1171	Stress concentration due to a finite rigid ribbon in the presence of a finite kinked crack: SH case
Lucia Drăguşin	1183	Bifurcations in the behaviour of granular materials. Stability and instability
S. Appleby and C. Atkinson	1197	Complementary variational principles for generalized dynamic continuum models
Jan Saczuk	1225	A canonical formulation of the shell theory

NUMBER 9

Mohammed Sabir	1233	Constitutive relations for magnetomechanical hysteresis in ferromagnetic materials
T. Angelov, A. Baltov and A. Nedev	1251	Existence and uniqueness of the solution of a rigid–plastic rolling problem
A. J. McMillan, G. R. Evans, B. C. Jones and M. I. Darby	1263	Calculation of forces and bending stresses in centrally struck circular plates
P. Chadwick	1273	Interfacial waves in an inextensible elastic composite
S. Hazanov and M. Amieur	1289	On overall properties of elastic heterogeneous bodies smaller than the representative volume
Jin H. Huang	1303	Elastic fields in polycrystalline or composite materials with slip inclusions

N. V. Chertova 1315 Gauge model of "plastically incompressible" medium. Configurations of normal oscillations with energy dissipation

J. T. Evans 1321 Bending produced by dislocations in a beam

K. Bhaskar and **L. Librescu** 1331 A geometrically non-linear theory for laminated anisotropic thin-walled beams

Hoa D. Nguyen 1345 Probabilistic modeling of moisture flow in layered vadose zone: applications to waste site performance assessment

Chien-Ching Ma and **Jann-Fang Lin** 1357 The investigation of the interfacial crack by the optical method

N. G. Kafoussias and **E. W. Williams** 1369 Thermal-diffusion and diffusion-thermo effects on mixed free–forced convective and mass transfer boundary layer flow with temperature dependent viscosity

Announcement and Call for Papers I

NUMBER 10

S. Dost and **H. A. Erbay** 1385 A continuum model for liquid phase electroepitaxy

Michele Ciarletta 1403 On the theory of heat-conducting micropolar fluids

E. Hervé and **A. Zaoui** 1419 Elastic behaviour of multiply coated fibre-reinforced composites

I. A. Z. Hefni, A. F. Ghaleb and **G. A. Maugin** 1435 Surface waves in a nonlinear magnetothermoelastic perfect conductor

Da Yu Tzou and **Yunsheng Zhang** 1449 An analytical study on the fast-transient process in small scales

G. Dassios, M. Hadjinicolaou, F. A. Coutelieris and **A. C. Payatakes** 1465 Stokes flow in spheroidal particle-in-cell models with Happel and Kuwabara boundary conditions

J. D. Lewins 1491 On the motion of charged particles in a varying magnetic field

S. K. Tomar and **Rajneesh Kumar** 1507 Reflection and refraction of longitudinal displacement wave at a liquid–micropolar solid interface

C. Nouar, M. Ouldrouis, A. Salem and **J. Legrand** 1517 Developing laminar flow in the entrance region of annuli—review and extension of standard resolution methods for the hydrodynamic problem

NUMBER 11

H. Pengfei, H. Ishikawa and Y. Kohno	1535	Analysis of the orders of stress singularity at the corner point of a diamond-shape rigid inclusion or hole in an infinite plate under antiplane bending by conformal mapping
Y. Kohno and H. Ishikawa	1547	Singularities and stress intensities at the corner point of a polygonal hole and rigid polygonal inclusion under antiplane shear
Giorgio Gentili	1561	Thermodynamic potentials for electromagnetic fields in the ionosphere
N. D. Rosen, S. K. Kurtz and K. J. Kozaczek	1577	Correction in the equation for the third order upper Kröner bound on the shear modulus of a polycrystalline aggregate of cubic crystals
P. Tuğcu	1581	Failure of internally pressurized cylindrical tubes for strain-rate dependent materials
George Z. Voyiadjis and Taehyo Park	1595	Local and interfacial damage analysis of metal matrix composites
Ruey-Bin Yang and Ajit K. Mal	1623	The effective transverse moduli of a composite with degraded fiber–matrix interfaces
Zhong Qi Yue and A. P. S. Selvadurai	1633	On the mechanics of a rigid disc inclusion embedded in a fluid saturated poroelastic medium
G. A. Maugin and C. Trimarco	1663	On material and physical forces in liquid crystals
P. Donald Ariel	1679	Stagnation point flow of a viscoelastic fluid towards a moving plate
Corrigendum	I	
Announcement	III	

NUMBER 12

Yusuf Orçan	1689	Residual stresses and secondary plastic flow in a heat generating elastic–plastic cylinder with free ends
P. A. Blythe, A. Liakopoulos and E. Haruta	1699	Thermally driven flows at low Prandtl numbers: an extension of the Prandtl–Batchelor theorem
A. Avudainayagam and J. Geetha	1713	Unsteady singularities of Stokes' flows in two dimensions
Richard B. Hetnarski and Józef Ignaczak	1725	Soliton-like waves in a low-temperature nonlinear rigid heat conductor

Chittur S. Venkatasubban 1743 A new finite element formulation for ALE (Arbitrary Lagrangian Eulerian) compressible fluid mechanics

E. Smith 1763 The relation between J_D and J_M for the centre cracked tension specimen geometry

D. V. Grylitsky and **V. J. Pauk** 1773 Some quasistationary contact problems for half-space involving heat generation and radiation

E. S. Şuhubi and **C. Tuncer** 1783 Symmetry groups for radial motions of compressible hyperelastic spheres and cylinders

P. Chaturani and **A. S. A. Wassf Isaac** 1807 Blood flow with body acceleration forces

S. Chakravarty, A. Datta and **P. K. Mandal** 1821 Analysis of nonlinear blood flow in a stenosed flexible artery

Z. Charki and **R. Kh. Zeytounian** 1839 The Bénard problem for deep convection: derivation of the Landau–Ginzburg equation

R. P. Chhabra 1849 Further remarks on the drag of a swarm of bubbles

NUMBER 13

D. Ieşan 1853 On the theory of bubbly fluids

Jacques M. Huyghe and **Dick H. van Campen** 1861 Finite deformation theory of hierarchically arranged porous solids—I. Balance of mass and momentum

Jacques M. Huyghe and **Dick H. van Campen** 1873 Finite deformation theory of hierarchically arranged porous solids—II. Constitutive behaviour

R. C. Sharma and **Urvashi Gupta** 1887 Thermal convection in micropolar fluids in porous medium

Jamal A. Masad and **Ridha Abid** 1893 On transition in supersonic and hypersonic boundary layers

J. M. Diani, H. Sabar and **M. Berveiller** 1921 Micromechanical modelling of the transformation induced plasticity (TRIP) phenomenon in steels

M. A. Ali 1935 The effect of a radial temperature gradient on the stability of Couette flow: non-axisymmetric modes analysis

J. Sarkar, M. L. Ghosh and **S. C. Mandal** 1943 Diffraction of elastic waves by two parallel rigid strips embedded in an infinite orthotropic medium

J. A. C. Martins, F. M. F. Simões, Fabio Gastaldi and **Manuel D. P. Monteiro Marques** 1959 Dissipative graph solutions for a 2 degree-of-freedom quasistatic frictional contact problem

M. A. Mikulinsky and D. S. Livshits 1987 Pre- and postbuckling behavior of mechanical structures in terms of phase transitions

NUMBER 14
